Projects

○ Ecommerce Website

- #Django #DRF #React #Redux #JWT
- Developed Authentication and Authorization into website using JWT
- Using Django ORM created Models for several classes like: Order, Product, etc.
- Created REST Api using Django Rest Framework, checked every endpoint using Postman
- Developed payment process, starting from shopping cart until order placement. Used PayPal as a payment method
- Developed Admin panel where users can apply CRUD operations on products, edit other user's info and mark order as delivered

○ SDU Career Roadmap

- #Django #HTML #CSS #Javascript
- Created custom User model, developed Authentication and Authorization into website
- Created several user groups each with different level of access
- Using Django ORM created Models for several classes like: Track, Task, etc.
- Established One-to-Many, One-to-One relationship between models.
- Developed system where student users should complete multiple tasks inside one track. After that user can acquire certificate with his/her name and name of the track
- Developed Admin panel where users can apply CRUD operations on tasks and tracks, edit other user's info and mark order as delivered
- Developed all the backend part of the project as well as majority of the page layout and some of the pages' UI/UX design

Experience

○ 08/21 - 11/21 MERIS DIGITAL SOLUTIONS - Atyrau city Frontend Developer, Intern

- Made front-end pages layout for several projects, as well as the company's Landing Page,
- Worked as a productive and positive team member to design, code, test, report, and debug operations.

Certificate

Python (Basic) by HackerRank
